

NAVIGATOR

Program Introduction

Navigator is a corporate executive leadership program designed to develop the competence of organizational leaders in today's fast moving businesses. The program is aimed at the participation and involvement of teams and leaders who take responsibility for the development of corporate cultures. During the program, executives develop better awareness and understanding of effective leadership behavioral principles and specific leadership competencies, whilst promoting and connecting these to corporate values and culture. Practical simulations integrated into the program become increasingly useful, as participants can experience first hand the challenges of behavioral change and influential practices.

The program is designed according to a modular structure, with each of the modules interlinked to ensure continuous connection and association to the challenges of leadership, team work and the working environment.

Navigator also creates a corporate networking forum, supporting the development of a strong sense of community. Participants share experiences and discuss cultural development, whilst the program fosters commitment to the attributes and values of your company. To transfer learning, the participants work together to create powerful strategies that can be connected to and applied immediately back in the workplace.

Navigator content:

As a customized program for one or two day delivery, design is based on your corporate culture, values and behavioral guidelines, leadership competence models and other strategic development directives. The program includes the following sessions:-

- Interactive business simulations
